

PYLEN Film-CT is an unstretched polypropylene film (CPP) made mainly from polypropylene and is superior in transparency, heat resistance, water resistance, and chemical resistance.

FUTURE

P1128 is superior in transparency and tear resistance.
 It is superior in low-temperature heat sealing ability, and the range of heat sealing temperature has increased.
 It excels in hot tack property.
 Minimizes slipperiness decrease even in high temperature aging after lamination.

USE

General lamination etc.
