Integrated “TOYOBO REPORT 2022” released

Toyobo Co., Ltd. has issued an integrated report titled “TOYOBO REPORT 2022,” and has posted it on its website. The report mainly comprises content from Toyobo’s Sustainable Vision 2030*¹ and the 2025 Medium-Term Management Plan*² unveiled on May 26, 2022.

The report also features a dialogue between the heads of Toyobo and Mitsubishi Corporation, which are launching a joint venture in 2023*³, as well as the Toyobo president’s dialogue with ESG (Environment, Society and Governance) investors. The report has richer content than previous ones due to the addition of new features such as two round-table discussions, one involving employees and the other outside directors. It also discloses Toyobo’s governance and strategy to address climate change based on TCFD (Task Force on Climate-related Financial Disclosures) recommendations.

Under its Sustainable Vision 2030, the Toyobo Group upholds the goal of becoming a sustainable company that contributes to society’s sustainability. Toyobo will actively utilize this report—which outlines the company’s efforts to realize this target—for dialogue with diverse stakeholders, including shareholders and investors. By doing so, Toyobo will do its best to win deeper understanding by stakeholders of policies and concrete measures undertaken by the company, while enhancing its corporate value in a sustainable way.
